Education

Sakarya University, BSc in Computer Engineering – Sakarya, Türkiye

Sept 2021 – June 2026

Projects

P2P File Exchange – github.com/ozan2003/p2p_file_exchange

Secure peer-to-peer file sharing application for local networks, using authenticated UDP discovery, TLS-encrypted TCP transfers, and SHA-256 integrity checks, built with C#/.NET and Avalonia UI.

RFC Reader – github.com/ozan2003/rfc_reader

Rust-based terminal user interface (TUI) reader that retrieves IETF RFCs on demand, caches them for offline access, and enables full keyboard-driven navigation.

- Supports in-document search a table of contents view and a command-line interface with options for offline mode and cache management.

Heartbeat Monitor – github.com/ozan2003/heartbeat_monitor

A lightweight Python client-server monitoring system using raw ICMP Echo messages and magic-byte-validated binary protocol to collect and verify server system metrics across networks.

- Features a configurable probe supporting TOML-based configuration discovery and local data persistence via SQLite with automated retention and cleanup of ICMP telemetry.

Skills

Programming Languages: Python, Rust, C#, C++

Tools: GNU Make, pytest, Git, uv

Network Simulation: GNS3, Cisco Packet Tracer

RDBMS: SQLite

Languages: Turkish (native), English
